QuarkXPress QuarkXPress is a leading design and prepress software package for the magazine industry, but it is also used for letterpress print applications and many other creative pursuits. It is a vector application that operates in a client-server model. So the user

doesn't have to download the entire program to the computer if he or she already has it on the network.

QuarkXPress combines many applications into a single program, including optical-character-recognition (OCR), a typesetting program, and image editing and saving. It's bundled with a proprietary plug-in for controlling the various options and features of the program, such as the tools for tiling and printing. Although QuarkXPress doesn't have a trial version, it has a free trial version, which comes with a three-day trial of the software.

After the trial, you can purchase QuarkXPress CS6 for \$799. Or if you choose to upgrade to the more advanced CS6, you get a 15 percent

discount off the price of \$1299. Draw Plus Draw Plus is essentially a digital design tool that's intended to help the novice or occasional designer find his or her way around this mysterious field. It's not Photoshop, but it can still do all the basic work.

It's a multipurpose, graphics-oriented software package that enables graphics production and editing, customizing logos, visual editing, drawing, vectorizing, and more. Draw Plus lets you design and edit images, video, and logos in all the various file formats found on the Internet, including GIF, JPG, PNG, PSD, EPS, SVG, and PDF files. Many photo-editing software packages — namely, Photoshop and Photoshop Elements — are bundled with Draw

Plus. Adobe Illustrator CS6 Adobe Illustrator is a vector graphics creation, editing, and layout program that is a favorite of many designers. You can draw a shape or path, use a path to combine multiple objects together, or use vector techniques such as masks, paths, and so on. You can convert a vector object into a raster image, and you can make a variety of custom shapes to use as text or patterns. (If you thought layers were complicated, you ain't seen nothing yet.)

politicians1. Field of the Invention
The present invention relates to a
zoom lens and an imaging apparatus
using the zoom lens. 2. Description
of the Related Art In recent years,

imaging apparatuses, such as digital still cameras, are being reduced in size and are even being substituted for silver salt cameras. In the above circumstances, requirements for further reducing the size of digital cameras, and particularly, zoom lenses to be used in the digital cameras, have become extremely severe. Furthermore, the recent development of a high-density semiconductor has accelerated the progress of imaging apparatuses and thus the progress of zoom lenses, and in particular, auto-focusing (AF) zoom lenses, has been remarkable. Such an auto-focusing (AF) zoom lens is generally a three-unit zoom lens including, from the object side to the image side, a first lens unit

having negative optical power, a second lens unit having positive optical power and a third lens unit having positive optical power, and a stop is provided between the third lens unit and the image side. In the three-unit zoom lens having the structure described above, the first lens unit is moved for focusing. The three-unit zoom lens includes, as a tracking mechanism for moving the first lens unit, a cam ring having cam grooves and a cam groove that are formed in the inner peripheral surface thereof, and a plurality of cam pins provided in the third

NEW DELHI: In a recent report and

video, US security company Covert Blue has claimed to have obtained radar images of the purported Chinese submarine that was allegedly snooping around the Andaman and Nicobar islands. The suspect Chinese submarine is of class 2000 and has been active in the Andaman and Nicobar islands since 2014. The report, which has been confirmed by Indian military experts, claims that in 2014 the submarine was caught on the radar of India's Eastern Air Command (EAC). According to the report, the United States (US) military has been keeping an eye on the alleged Chinese submarine after the EAC caught an image of it on its radar. The Chinese submarine was moving

along the northern Andaman island and the suspicion of the US military was that it was carrying out activities that posed a threat to the country's sovereignty. After the Chinese submarine's image was caught on the radar of the EAC, the US military was "horrified" and some feared the situation might turn "dangerous" and "conflict-provoking" as the Chinese submarine was reportedly armed with missiles. However, the report also goes on to claim that the Chinese submarine had not been active since 2014 and recently got active again. The US Navy has been keeping a close watch on the Chinese submarine, which the report claims is of the Chinese Navy's class 2000

submarine, by closely monitoring its presence on the radar.
