The background sea is both a deep aqua, since the sand in the dune is reflected in the water and a silvery blue, since the dune is composed of layers of sand and driftwood. Explore the Collections Philadelphia Museum of Art: Handbook of the Collections By the late nineteenth century, Sandhurst was widely recognized as one of the outstanding artists in the Barbizon school of painting. Few works by Sandhurst remain; this composition of the late 1880s is an unusual treat, given the symbolism of the sea and sand, the tranquility of the scene, and the fact that the bluish sky is within the figures' line of vision, as opposed to in a more distant perspective. William Rufus Searle (1841-1912) was an English painter who spent much of his life in Paris. He later moved to New York, and then to Philadelphia, where he taught for more than thirty years:Turn Out the Lights "Turn Out the Lights" is a song co-written and recorded by American country music artist Margo Smith. Desalination — using water that contains a lot of salt — is problematic, as it requires a lot of energy and can also release water pollution into the environment. But methods being developed to do it are only currently effective at low-to-moderate volumes, so researchers are continually looking for ways to improve them. In a new study, the researchers show that by increasing the surface area of the porous structures in contact with water, current desalination techniques can be more effective. The technique works best at higher temperatures than are currently used, which could make it more effective at desalinating seawater, which is the source of much of the world's fresh water. They describe their work in a paper published in the journal Nature today.
