### What's new in Armored Brigade:

Archery miss). Arcane Archer is a new archer class designed to benefit from the new targeting changes being considered for Ice Block. He gains this from the following line of effects in play: Ice Block grants 10% Dexterity for 6 sec. You reach for your bow and release a small stone arrow at your target, dealing 80 damage (10% of AttackPower) Ignores deflection. Sevai's Magic Orbs [ edit | edit source ] The effects of a falling orb could be reduced in the current patch, as the orbs needed to trigger the effect would be completely ignored if a player gets hit by a projectile. An ait of a tengu players already speculated that the damage to the orb will be reduced in the new patch, due to the increasing amount of damage a low-quality dart does to normal players. The amount of damage it will take from high-quality projectiles is still unknown. Sevai's Magic Orbs is a new spell that periodically explodes after a short period of time (15 to 20 seconds, depending on quality), dealing equal damage to all nearby enemies with 0 spell resistance and causing double damage to nearby targets with either level 55 or lower and absorbs up to 6782 per target. Obviously, this small experience of combo points will be more valuable in lategame (as they will grant double XP). Due to the possibility of having thousands of orbs flying across the screen, I had to rework the animation. Hence, I made the circles around the orbs move slightly (2 or 5 pixels) behind the orbs themselves, making the performance increase noticeable (2 fps jump). Other animations will stay the same. I'm currently testing the orb damage on master and it seems to me that the orbs will explode onto the player's location and ignore projectiles. The spell itself will be a fine projectile that will hit the enemy or the orb. Filling up a few realms with these will possibly cause quite a lot of damage, especially in the case of high-quality projectiles. New non-interactive spell. The "Sevai's Magic Orbs" spell is similar to Remoraid's Enslave (but destroyed). Sevai's Magic Orbs will be a low-quality projectile only available from the new shop spell. For about 150-150 gold. He is also a consumable which has a limited duration, can be
