## Full Fix Ulead GIF Animator 5.0

Ulead doesn't even own it anymore. It was sold to Corel, who immediately discontinued it. It's been FREE for years with PhotoImpact. It is still available in Corel. NET version, although this is not part of the core products. Ulead was the last video editing software vendor to continue to support and release new versions. Eventually, in 1998 (and for several more years after the sale), they released the Ulead 6 Pro. It was a really beautiful, easy to use and powerful product.

The three-dimensional structure of lipid membranes and the coupling between the lipid bilayer and the underlying cell surface depend on the distribution of their components. Because the components interact with each other via attractive forces, the distribution of those components is spatially heterogeneous. Here we apply a single-molecule force spectroscopy technique to investigate the distribution of adenosine-5'-triphosphate (ATP) molecules across a lipid bilayer under the force of an atomic force microscope tip. In this technique, force measurements are used to extract the interactions between the surface component of the ATP molecule and the lipid bilayer. The three-dimensional orientation of the ATP molecules at different regions of the lipid bilayer are then determined based on the calculated interaction forces between the lipid bilayer and ATP.
